Vision Statement

The fundamental basis of the Accessman brand, is that of a company based on integrity, reliability and a level of service that is second to none, whilst also ensuring that opportunities are being provided for our staff, commonly referred to as the "A Team".

These principles remain today as we sustain continued growth across the markets we operate within Nationwide.

Safety and innovation continue to be at the forefront of our next growth phase, while also encompassing a more "sustainable" vision in all areas of our operations.

Our ability to not only maintain our presence, but strengthen it, comes with the knowledge that timing is everything. Having the foresight to meet the market and diversify when required , provides clients the reassurance that Accessman will always deliver.

"Success is about creating benefit for all, and enjoying the process".

— LENA HARRINGTON, GROUP GENERAL MANAGER

The Accessman Group now has a fleet in excess of over 1200 machines, making Accessman one of the largest specialised access hire companies in New Zealand.

Need accredited training?

*Accessman
conducts EWP
Operator Training
in 6 centres
nationwide!*

Accessman takes safety so seriously that they have their own accredited training centres offering EWP operator training from the International Powered Access Federation (IPAF) and HIANZ.

For further information on any of our training courses IPAF or Silvercard, please email training@accessman.co.nz or alternatively visit our website www.accessman.co.nz.

SILVERCARD™

The HIANZ (Hire Industry Association of New Zealand Inc) EWP Silver Card course was re-developed to meet the requirements of the Best Practice Guidelines for Mobile Elevating Work Platforms (Released August 2014). The course is comprised of both practical and theory based learning complete with assessments. The classes are kept small to maximize individual learning.

The Course is based on an NZQA standard for EWP. Upon completion of the course, training records are submitted and you will be provided a digital Silvercard, that can be accessed via the HIANZ App.

All of our trainers are IPAF or Silvercard registered assessors. We offer courses on Scissor Lift, Boom Lift, Trailer Mounted (Cherry Picker), Vertical Lift (Mast Lift). Refresher courses are also available upon request.

- 1 machine - 1/2 day duration
- 2 machines - 1 day duration
- 3 machines - 1 1/2 day duration

For more information or to book
your course, contact us at
training@accessman.co.nz

KNUCKLEBOOM

Need to do a one man job?

The perfect machine for one-man jobs! These narrow machines are suited to indoor tasks that require only one operator in the basket for the purpose of going up and down.

They are battery powered keeping noise to a minimum, while ensuring that there are no diesel fumes. Non-marking tyres are standard to minimise the possibility of damage to indoor floor coverings, while a tight turning circle makes these machines incredibly manoeuvrable.

Vertical Personnel Lifts are available in various sizes. Certain models are compact and can be towed behind a suitable vehicle. For those that can't be towed, Accessman will deliver to and collect from your job site.

Machine availability and specifications do vary between regions. Please contact your local branch for more information.

Need to work indoors at height?

If you need to work indoors at height, an Electric Scissor Lift is the machine for you.

They are compact to enable you to access tight areas or to manoeuvre between aisles and around other machinery, while battery power ensures there are no diesel fumes and minimal noise. They have a tight turning circle and **non-marking tyres** which minimises the possibility of damage to indoor floor coverings.

Electric Scissor Lifts are available in 3-metre, 4-metre, 6-metre, 8-metre, 10-metre, 12-metre and 14-metre varieties; providing height access for a range of situations. Additional versatility is provided via varying deck width options plus a roll-out deck extension that provides extra reach over objects.

Machine availability and specifications do vary between regions. Please contact your local branch for more information.

Need to work outdoors at height?

This machine is ideally suited to outdoor work; where uneven surfaces require additional stabilisation or where 4WD access is necessary; however with adequate ventilation they can also be used indoors. Electric rough terrains are also available. An articulating rear axle and hydraulic stabilizers on each corner of the machine provides a level working platform regardless of the terrain; while varying deck width options plus a roll-out deck extension ensures sufficient capacity for multiple workers and tools.

Rough Terrain Scissor Lifts are available in 8-metre, 9-metre, 10-metre, 12-metre, 18-metre and 20-metre varieties. Some models have an option of **non-marking tyres**. This machine can not be towed with a car, so Accessman will deliver and pick-up your Rough Terrain Scissor Lift, to and from your job site.

Machine availability and specifications do vary between regions. Please contact your local branch for more information.

Need to work indoors and outdoors?

With unrivalled telescopic reach and bi-fuel capacity (both battery and petrol power options), Cherry Pickers are suitable for both indoor and outdoor jobs. They are versatile and able to access tight areas and are almost silent when operated by battery. Hydraulic stabilisers on each corner of the machine provides a level working platform regardless of the terrain while in-basket controls give workers full control to manoeuvre the working platform to where it is needed.

Accessman will provide you with a free harness to wear while working in the basket of the Cherry Picker as per national Health & Safety requirements.

Cherry Pickers are available for hire with a 12-metre, 13-metre, 16-metre and 17-metre reach. Your Cherry Picker can be delivered or you can tow the machine with a suitable vehicle.

Machine availability and specifications do vary between regions. Please contact your local branch for more information.

Need the perfect all-rounder?

The perfect all-rounder, Knucklebooms allow you to be mobile while reaching up and over objects. They have exceptional reach via a telescopic upper boom; while in-basket controls provide accuracy when positioning the working platform.

Electric Knucklebooms are great for indoor use or outside on level ground. Some machines have non-marking tyres which minimises the possibility of damage to indoor floor coverings, while bi-fuel (battery and diesel power options) provides minimal noise and no diesel fumes. 4WD Knucklebooms can only be used outdoors (unless suitable indoor ventilation). Their all-wheel drive capabilities make them ideal for accessing work sites over rough terrain.

Knucklebooms can be driven while the basket is elevated, making this machine perfect for jobs where progress requires repositioning of the work platform. Accessman will provide you with a free harness to wear while working in the basket of the knuckleboom as per national Health & Safety requirements.

Knucklebooms are available in 12 metre, 15 metre, 16 metre, 17 metre, 18 metre, 20 metre, 21 metre, 26 metre, 28 metre, 32 metre and 41 metre varieties. They can not be towed, so Accessman will deliver and pick-up your Knuckleboom to and from your job site.

Machine availability and specifications do vary between regions. Please contact your local branch for more information.

Need to work in a tight space?

Do you need to work in a tight space where tail swing from a machine would be detrimental? Telescopic Booms have zero tail swing making them perfect for working in restrictive areas. These machines have excellent reach and are well suited to outdoor jobs on level ground.

Operators are given complete control from the basket; making precision manoeuvres easy. Accessman will provide you with a free harness to wear while working in the basket of the Telescopic Booms as national health and safety laws require this.

Telescopic Booms are available in 23-metre varieties.

4WD Telescopic Booms cannot be towed so Accessman will happily deliver and pick-up your machine, to and from your job site.

Machine availability and specifications do vary between regions. Please contact your local branch for more information.

Tracess I70 Spider

Nick named the Spider – this tracked machine has a bi-fuel engine, where it can run on 110V electricity or Petrol engine.

The tracked access platform is a unit with a very small base but a platform with a large cage and excellent working envelope. The cage can be readily removed to allow the unit to pass through a single standard doorway.

Offering 17m of working height and 7.5m of working outreach, 90 degree each way cage rotation, a light transit weight, and small footprint but at the same time a 200 kg payload throughout the whole working envelope.

Need manoeuvrability?

The Telehandler is a versatile machine predominantly used to move materials around building sites. This makes them perfect for building and construction sites and farms, where they will increase efficiency by reducing labour requirements.

This machine is unbeatable for manoeuvrability; it has an extremely tight turning circle and three different steering modes making it possible to position the machine accurately for best reach. Steering modes include: front or two wheel steer, round or four wheel steer and crab steer.

Our Telehandlers are powered by a four cylinder Deutz turbo-charged diesel engine, perfectly suited for driving the machine in all conditions. Additional stabilisation can be added using optional outriggers which also significantly increase the load capacity at maximum reach.

Adding to this machines versatility; fork, bucket and crane extensions are also available.

Machine availability and specifications do vary between regions. Please contact your local branch for more information.

HAULOTTE HTL3510	
Maximum Lift Capacity	3500kg
Maximum Lift Height	9.8m
Maximum Reach Below Grade	2.2m
Maximum Forward Reach	7.2m
Overall Length	4.96m
Overall Width	2.26m
Overall Height	2.42m
Wheelbase	2.78m
Grounder Clearance	42cm
Weight (With Forks)	8610kg
Branch Availability	Contact Local Branch
